

5-key call button

TL-AK01

"Material: ABS+Acrylic Frequency: 433MHZ Battery:12V/23A
,Colour : Black, Size: 140*87*27mm".

Applications

- **Restaurants:** Enables chefs or kitchen staff to quickly summon waitstaff for order pickups, ensuring smooth communication and faster service.
- **Hospitals and Clinics:** Allows patients to alert nurses or medical staff when assistance is needed, enhancing response times in healthcare settings.
- **Hotels:** Facilitates guest requests by allowing them to call for room service, housekeeping, or other services directly from their room.
- **Factories:** Workers on the production floor can use the system to notify supervisors or maintenance teams of equipment issues or urgent needs.
- **Offices:** Used to streamline internal communication, enabling staff to request assistance or alert teams about meetings or deliveries.
- **Supermarkets and Retail:** Allows customers or staff to call for assistance at service counters or in-store departments.
- **Warehouses:** Warehouse personnel can use the system to call for additional labor, equipment, or supervisor assistance.
- **Schools and Universities:** Teachers or administrative staff can use it to alert maintenance teams or call for assistance in classrooms or halls.
- **Senior Care Homes:** Residents can use the system to call caregivers, ensuring prompt attention in cases of medical needs or assistance with daily tasks.
- **Event Management:** Event staff can use the system to communicate backstage, with security, or among different event teams for coordinated operations.

Features

- **Customizable Iconography:** The system's icon display is fully customizable to meet specific branding or user preferences.
- **User-Defined Keywords:** Keywords can be tailored according to the specific application, allowing for a more personalized user experience.
- **Custom Logo Integration:** Logos can be added even for small-batch orders, enabling brand-specific customization.
- **Watch Signal Coverage:** When used with a wristwatch receiver, the system offers a signal range of approximately 150 meters in unobstructed environments.
- **Screen Receiver Signal Range:** Signal coverage extends to around 200 meters in open areas when paired with a screen receiver.
- **Battery Life:** The transmitter's battery life ranges from 10 to 12 months, depending on the frequency of use.
