## TL-XT02

"Material: ABS    Input: 110-240V    Frequency: 433MHZ  
, Colour : Black, Size: 165\*110\*35mm".

---

## Applications

- Restaurants: Enables chefs or kitchen staff to quickly summon waitstaff for order pickups, ensuring smooth communication and faster service.
- Hospitals and Clinics: Allows patients to alert nurses or medical staff when assistance is needed, enhancing response times in healthcare settings.
- Hotels: Facilitates guest requests by allowing them to call for room service, housekeeping, or other services directly from their room.
- Factories: Workers on the production floor can use the system to notify supervisors or maintenance teams of equipment issues or urgent needs.
- Offices: Used to streamline internal communication, enabling staff to request assistance or alert teams about meetings or deliveries.
- Supermarkets and Retail: Allows customers or staff to call for assistance at service counters or in-store departments.
- Warehouses: Warehouse personnel can use the system to call for additional labor, equipment, or supervisor assistance.
- Schools and Universities: Teachers or administrative staff can use it to alert maintenance teams or call for assistance in classrooms or halls.
- Senior Care Homes: Residents can use the system to call caregivers, ensuring prompt attention in cases of medical needs or assistance with daily tasks.
- Event Management: Event staff can use the system to communicate backstage, with security, or among different event teams for coordinated operations.

## Features

- Touch-Sensitive Keyboard: Equipped with a responsive touch interface for seamless input and control.
- Chef-Waiter Communication Integration: Compatible with wristwatch devices, enabling chefs to directly alert waitstaff for improved service efficiency.
